OBJECTIVE

Software Developer with backend expertise in Node.js and Python, and a strong foundation in scalable system design, RESTful API development, and cloud-integrated applications. Proven experience with SQL databases, DevOps concepts, and real-time system monitoring. Eager to contribute to enterprise-grade applications using modern technologies, and adapt to .NET and cloud ecosystems in a collaborative Agile environment.

WORK EXPERIENCE

GOKALDAS EXPORTS LTD

Bengaluru

Backend Development Intern

Oct 2024 – Jan 2025

- Assisted in architecture, system design, and network infrastructure analysis to ensure scalability, security, and optimal performance of the application.
- Developed and maintained RESTful APIs using Node.js, ensuring smooth integration with the frontend for real-time factory operations.
- Designed and created database tables in MySQL, managing schema design and optimizing queries for performance and scalability.
- Tested all backend APIs using Postman before integration, ensuring proper functionality, data validation, and error handling in production-like environments.

ENTERPRISE BUILDING TRAINING SOLUTIONS (EBTS) LLP

Bengaluru

Cybersecurity Essentials Trainee

May 2023 – May 2023

- Gained practical experience working with tools such as Kali Linux, Nessus, Metasploit, Pentbox, and Wazuh for vulnerability assessment and penetration testing.
- Developed proficiency in Linux system navigation and security configurations, focusing on secure operations and system hardening technique.
- Explored and analyzed mobile tracking applications, understanding their functionality and security aspects to assess vulnerabilities and ensure data protection.

UNIVERSITY PROJECTS

METRO PARKING APP

- Designed and developed a React Native-based metro parking app with MongoDB, integrating Razorpay for seamless digital payments.
- Implemented a license plate-based vehicle management system, enabling real-time search, parking fee calculation, and automated SMS notifications via Twilio.

INTRUSION DETECTION SYSTEM

- Built a Fast-API based backend for a real-time intrusion detection system, integrating XGBoost models and MySQL for storing classified network traffic.
- Automated model retraining, background packet capture, and REST APIs for live predictions, logs, and manual overrides, integrated with a dashboard for real-time monitoring.
- Simulated and automated brute-force, SQL injection, and DoS attacks using Linux tools and Python scripts to test real-time detection capabilities of the intrusion detection system.

EDUCATION

JYOTHY INSTITUTE OF TECHNOLOGY

CGPA – 8.3/10

Bachelor of Engineering in Computer Science and Engineering

2021 - 2025

SRI CHAITANYA PU COLLEGE

Percentage - 88

Second Year Pre-University

2019 – 2021

MITRA ACADEMY

Percentage - 77

Class 10

2008 – 2019

ADDITIONAL SKILLS

Technical Skills: Advanced Java, MERN stack, SQL, Django, Git, Docker, Kubernetes.

Certifications: Mastering Next JS , Fundamentals of DevOps On AWS(EC2&S3),
